

HOME AUTOMATION SYSTEMS - Modules for Domoticz, Home Assistant, Node-RED...

Creasol DomESP1

Electronic board (without case) for NodeMCU ESP8266 board, 900mil pitch

This board make easier to use ESP8266 WiFi microcomputer. Can be supplied from 8 to 25Vdc, integrates a high efficient switching mode regulator with 5Vdc output, also available on terminal block. The board has 4 relays (250V 5A switch capacity), 1 solid state relay output (60V 100mA), 2 high power mosfets 30V 12A (for led stripe dimming), I²C bus circuitry (SDA+SCL), 1wire sensors circuitry, 3 I/sO (can be used with some limitations) and 1 analog input.

Can be used together with ESP8266 MCU board, programmed with EasyESP firmware, to communicate to a Domoticz controller, extending the I/O and sensors attached to Domoticz. More info at <https://www.creasol.it/DomESP1>

Price/each, VAT excluded

End-User recommended price (for 1pce)

33,00 EUR + VAT

70x70x17 61g

Creasol DomESP1+ESP8266 module

Electronic board (without case) with NodeMCU ESP8266 module, ready to be used, already programmed with ESPEasy firmware.

Creasol DomESP1 board (see above) completed with ESP8266 board, already programmed and ready to use. This board make easier to use ESP8266 WiFi microcomputer. Can be supplied from 8 to 25Vdc, integrates a low power dissipation switching mode power with 5Vdc output terminal block, 4 relays (250V 5A switch capacity), 1 solid state relay output (60V 100mA), I²C bus circuitry (SDA+SCL), 1wire sensors circuitry, 3 I/O (can be used with some limitations) and 1 analog input.

Can be used to extend I/O and sensors attached to a Domoticz controller. More info at <https://www.creasol.it/DomESP1>

39,00 EUR + VAT

70x70x20 65g

Creasol DomESP2

Electronic board (without case) for NodeMCU ESP8266 board, 900mil pitch

Exactly as DomESP1, but with plugin terminal blocks.

This board make easier to use ESP8266 WiFi microcomputer. Can be supplied from 8 to 25Vdc, integrates a high efficient switching mode regulator with 5Vdc output, also available on terminal block. The board has 4 relays (250V 5A switch capacity), 1 solid state relay output (60V 100mA), 2 high power mosfets 30V 12A (for led stripe dimming), I²C bus circuitry (SDA+SCL), 1wire sensors circuitry, 3 I/sO (can be used with some limitations) and 1 analog input.

Can be used together with ESP8266 MCU board, programmed with EasyESP firmware, to communicate to a Domoticz controller, extending the I/O and sensors attached to Domoticz. More info at <https://www.creasol.it/DomESP1>

Creasol DomRelay2

2 relays module

Compact module, 43x24x25mm, within **2 relays with 12V 200mW coil, 250V 5A SPST contact** with special material designed to **prevent contact welding** due to excessively high surge current load (capacitive loads or tungsten lamps).

Contacts are **protected from overvoltage** by metal oxide varistors; coils are protected from overvoltage by free-wheeling diodes.

More info at <https://www.creasol.it/DomRelay2>

Price/each, VAT excluded

End-User recommended price (for 1pce)

14,50 EUR + VAT

43x24x25 19g

Creasol DomRelay2x3

2 relays module - Clamshell within 3 modules

Compact module, 43x24x25mm, within **2 relays with 12V 200mW coil, 250V 5A SPST contact** with special material designed to **prevent contact welding** due to excessively high surge current load (capacitive loads or tungsten lamps).

Contacts are **protected from overvoltage** by metal oxide varistors; coils are protected from overvoltage by free-wheeling diodes.

53x89x65 130g

Creasol DomBusEVSE

Creasol DomBusEVSE is a fully tested DIN rail module, designed for Domoticz home automation system, to **charge electric vehicles using the standard IEC 62196-2 Mode3** (AC charge, up to 22kW power).

It works as **stand-alone** (without any domotic controller) or in **managed mode** (charging current controlled by Domoticz).

Features

- **Manages up to 4 Modbus energy meters** DDS238-2 ZN/S, one to measure the charging power/energy, one to measure the power/energy exchanged with the electricity grid. Can also be connected to other 2 energy meters to monitor other loads/circuits, if needed (heat pump, kitchen, ...). Get **accurate statistics and charts** about energy used to charge the electric vehicle and energy exchanged with the grid.
- Controls an external 2P or 4P contactor to enable or exclude mains power supply to the electric car, and fully check that contactor works as expected.
- **5 working modes**, that can be configured by the Domoticz UI or by 2 UP/DOWN buttons:
 - OFF**: EV charging disabled (led status: red)
 - SOLAR**: use only energy from the solar system, assuring that power from grid is 0 (led status: green)
 - 25%**: use both solar and grid energy, max 25% of the power availability (for example, with 6kW contract, use max 1500W from grid, + available power from solar) (led status: yellow)
 - 50%**: use both solar and grid energy, max 50% of the power availability (for example, with 6kW contract, use max 3kW from grid) (led status: yellow)
 - 75%**: use both solar and grid energy, max 75% of the power availability (for example, with 6kW contract, use max 4500W from grid) (led status: yellow)
 - 100%**: use both solar and grid energy, max full power (for example, with 6kW contract, use max 6kW) (led status: yellow). In this mode it's also possible to set a consumption profile which includes two maximum power thresholds which are alternated for the duration of two configured times, to use the really max power from the grid. **For example, in Italy with a 6kW contract it's possible to drain max 7.6kW for 90 minutes, than 6.6kW for 90 minutes.**
 - MANAGED**: charging current set by the domotic controller (by a script, for example) (led status: blue)
- **AUTOSTART** function: when the vehicle is plugged again, the charging mode is automatically restored to the previous charging mode.
- It displays **nice charts** with
 - charging power/energy, that is differentiate into the two following charts
 - charging power/energy from solar (photovoltaic or other renewable source)
 - charging power/energy from the electricity grid
 - charging voltage and power factor
 - total power/energy from grid
 - grid voltage, power factor and frequency
- RGB led displaying current EV state

MicroSD 64GB high endurance, U3 V30 (30Mbyte/sec write speed) with Raspbian + Domoticz + Firewall + backup

High endurance memory card for Raspberry PI4 and PI3, with the last version of Raspbian operating system optimized to limit flash writings, extending the memory life.

Domoticz software already installed, as like as firewall script and backup system that can be configured to export backups and memory images to external NAS.

Price/each, VAT excluded

300x300x80 3.6kg

Cable for RS485, 100m NOT AVAILABLE

Professional 100m flex cable for RS485 (and Modbus) serial bus. 4 wires + shield: 2*0.22mm twisted (120 ohm impedance, for data) + 2*0.5mm (for supply) + shielding. External diameter 5.5mm.

The ideal cable to connect Creasol DomBus I/O expanders to Domoticz home automation controller.

The twisted pair (yellow+white 0.22mm² wires) has 120 Ohm impedance and permit to get a reliable data transfer at high bitrates and long distance (115200bps for several hundreds of meters).

The red/black wires (0.5mm²) can be used to supply all devices connected to the bus.

The shield is made by a aluminum foil + drainage tinner copper wire, and should be connected to GND to avoid interferences and crosstalk caused by other cables.

REMOTE CONTROL DUPLICATORS

60x31x13mm, 35g

Creasol Multi

Multi-frequency universal remote control duplicator, for gates, garage doors, traffic barriers,

Duplicates up to 4 remote controls, even if they transmit in different frequencies, inside the following ranges: 286+361, 384+418, 433.92 and 868.3 MHz.

Supplied in transparent resealable clamshell, 66x110x15mm dimensions, with printed instructions in 4 languages.

OEM customized instructions available on request. Discount available for orders with more than 250pcs.

Price/each, VAT excluded

60x37x14mm, 16g

Creasol MultiST

Multi-frequency universal remote control duplicator, for gates, garage doors, traffic barriers, in light-weight soft-touch plastic casing.

Available colors: **coffee, red, yellow, lightblue, green, beige**

Duplicates up to 4 remote controls, even if they transmit in different frequencies, inside the following ranges: 220+330, 384+418, 433.92 and 868.3 MHz.

Supplied in transparent resealable clamshell, 66x110x15mm dimensions, with printed instructions in 4 languages.

OEM customized instructions available on request. Discount available for orders with more than 250pcs.

Price/each, VAT excluded

STATIONARY TRANSMITTERS / DUPLICATORS

41x31x11mm, 10g

Creasol Sender

1-4 channels multi-Frequency remote control duplicator, supplied externally. Useful device to install into a car: open up to 4 automations pushing the brake pedal or highbeam lever.

Should be connected to the power supply through a switch: when the switch is pressed, the device start to transmit the code that was previously learned, activating the receiver. Wide power supply range: 5-36Vdc or 7-27Vac.

Suitable for opening gate and garage door (when placed in the car fuse-box, connected to brake light or highbeam headlamp, pulsing 2-5 times will activate up to 4 automations), or for home automation (for example to notify the domotic controller when someone press the door bell switch).

Operating frequency selected by the tact switch: 433.92, 868.3, 288, 300, 303, 306, 310, 315, 318, 330, 390, 403.55, 418 MHz

OEM customized instructions in 2 languages on request. Discount available for orders with more than 20pcs.

Price/each, VAT excluded

| | | | |
|--|--|--|--|
| | | | End-User recommended price (for 1pce) |
| | | | 34,00 EUR + VAT |

41x31x11mm, 16g

Creasol SenderBatt

4 channels transmitter/duplicator that should be connected to 1-4 switches.

Battery supplied (CR2032), long battery life, can also be supplied externally (2.4-3Vdc); multifrequency transmitter that is able to copy up to 6 remote controls, associated to 6 channels:

Channel 1: when external switch1 gets closed

Channel 2: when external switch2 gets closed

Channel 3: when external switch3 gets closed

Channel 4: when external switch4 gets closed

Channel 5: when external switch1 gets open

Channel 6: when external switch2 gets open

Suitable for opening gate or garage door (placed in the car), or for home automation (send a code to the domotic controller when a button has been pressed) or for enabling/disabling air conditioning (when one window gets open, send command to disable air conditioning; when window gets closed, enable air conditioning), ...

OEM customized instructions in 2 languages on request. Discount available for orders with more than 20pcs.

Price/each, VAT excluded

| | | | End-User recommended price (for 1pce) |
| | | | 39,00 EUR + VAT |

UNIVERSAL MULTIFREQUENCY RECEIVERS, AM/FM

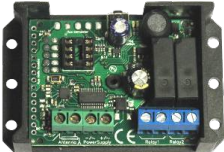

Creasol UniRec1
Universal multi-frequency receiver, 1 channel, 60V 50mA output capability
 Suitable to be connected to any electronic board with a low-voltage input button, like gate controller/operator, suitable to be used with almost any remote control in the market. Up to 60 remote controls can be learned into the receiver.
 1 opto-insulated output, can be supplied at 5+36Vdc or 7+27Vac.
 Operating frequency selected by the tact switch: 433.42, 433.92, 434.15, 434.42, 868.3, 868.5, 868.8, 288, 300, 303, 306, 310, 315, 318, 330, 390, 403.55, 418 MHz, AM and FM. Works with both fixed and rolling code remote controls.
 From Rev.5b you can program 2 different frequencies and modulations of your choice, so UniRec1 can be used with almost any remote controls transmitting in the selected frequencies with selected modulations (AM or FM).
 Supplied in transparent resealable clamshell, 66x110x15mm dimensions, with printed instructions in 4 languages.
 OEM customized instructions available on request. Discount available for orders with more than 20pcs.

| Price/each, VAT excluded | | | End-User recommended price (for 1pce) |
|--------------------------|--|--|---------------------------------------|
| | | | 39,00 EUR + VAT |

Creasol UniRec12
Universal multi-frequency receiver, 2 channels, 60V 50mA output capability
 Suitable to be connected to any electronic board with one or two low-voltage input buttons, like gate controller/operator, suitable to be used with almost any remote control in the market. Up to 60 remote controls can be learned into the receiver.
 2 opto-insulated output with 60V 50mA max capability. Can be supplied at 5+36Vdc or 7+27Vac.
 Operating frequency selected by the tact switch: 433.42, 433.92, 434.15, 434.42, 868.3, 868.5, 868.8, 288, 300, 303, 306, 310, 315, 318, 330, 390, 403.55, 418 MHz, AM and FM. Works with both fixed and rolling code remote controls.
Can be setup to receive in 2 different frequencies and modulations of your choice, for example 868.8 MHz FM and 433.92 MHz AM.
 Supplied in transparent resealable clamshell, 66x110x15mm dimensions, with printed instructions in 2 languages.
 OEM customized instructions available on request. Discount available for orders with more than 20pcs.

| Price/each, VAT excluded | | | End-User recommended price (for 1pce) |
|--------------------------|--|--|---------------------------------------|
| | | | 44,00 EUR + VAT |

Creasol UniRec2
Universal multi-frequency receiver, 2 relay channels
 Operating frequency selected by the tact switch: 433.42, 433.92, 434.15, 434.42, 868.3, 868.5, 868.8, 288, 300, 303, 306, 310, 315, 318, 330, 390, 403.55, 418 MHz, AM and FM. Works with both fixed and rolling code remote controls.
 From Rev.5b you can program 2 different frequencies and modulations of your choice, so UniRec1 can be used with almost any remote controls transmitting in the selected frequencies with selected modulations (AM or FM).
 Up to 240 different remote controls. Optionally, it's possible to place a memory to increase the number of remote controls up to 1000.
 2 relay outputs, 250V 5A capable (5A for resistive load, for inductive loads the current should be lower).
 Wide range power supply: from 7 to 27Vac and from 6 to 36Vdc.
 Low power consumption and dissipation, thanks to the switching mode power supply: max current consumption (when both relays are ON) is 100mA@6Vdc and only 23mA@36Vdc.
 Compact dimensions: 74x47x24mm.
 Supplied in transparent resealable clamshell, 66x110x30mm dimensions, with printed instructions in 3 languages.
 OEM customized instructions available on request. Discount available for orders with more than 20pcs.

| Price/each, VAT excluded | | | End-User recommended price (for 1pce) |
|--------------------------|--|--|---------------------------------------|
| | | | 53,00 EUR + VAT |

Creasol UniRec2 - External memory (optional)
Universal multi-frequency receiver, 2 relay channels
 Extend the number of remote control that can be learned into UniRec2 receiver. Supports up to 1000 remotes (15 times more than without external memory).
 Installing the memory on the socket, all parameters and remote controls will be saved in the memory, so it's easy to save and copy the whole configuration just using an EEPROM reader/writer. Discount available for orders with more than 20pcs.

| Price/each, VAT excluded | | | End-User recommended price (for 1pce) |
|--------------------------|--|--|---------------------------------------|
| | | | 2,00 EUR + VAT |

DOOR OPENERS (electric lock and strike plate opener)

41x31x11mm, 19g

Creasol UniLock

Very compact universal electric lock opener

Suitable to activate any electric lock, normally supplied at 12-15Vac/dc, by pressing a button on the remote control. Can be used with almost any remote control in the market. Up to 60 remote controls can be learned into this receiver.

Very easy installation: only 2 wires that should be connected in parallel to the existing button switch.

When a valid code is received, the two wires are shorted by an internal electronic switch with 3,2A capability.

Operating frequency selected by the tact switch: 433.42, 433.92, 434.15, 434.42, 868.3, 868.5, 868.8, 288, 300, 303, 306, 310, 315, 318, 330, 390, 403.55, 418 MHz, AM and FM. Works with both fixed and rolling code remote controls.

From Rev.5b you can program 2 different frequencies and modulations of your choice, so UniRec1 can be used with almost any remote controls transmitting in the selected frequencies with selected modulations (AM or FM).

Supplied in transparent resealable clamshell, 66x110x15mm dimensions, with printed instructions in 2 or more languages.

OEM customized instructions available on request. Discount available for orders with more than 20pcs.

|--------------------------|--|--|--|
| | | | End-User recommended price (for 1pce) |
| | | | 39,00 EUR + VAT |

41x31x11mm, 21g

Creasol UniLock+buzzer

Very compact universal electric lock opener, with buzzer

Same device as UniLock, same features, adds audio notification when door opens: it reproduces a dual tone alert when door is opened by remote control, and optionally a different dual tone alert when door is opened by external pushbutton.

| Price/each, VAT excluded | | | |
|--------------------------|--|--|--|
| | | | End-User recommended price (for 1pce) |
| | | | 40,30 EUR + VAT |

14x14x4mm 1g

Buzzer

Compact passive piezoelectric buzzer, suitable for Creasol UniLock

14mm dia, 4mm high, with 2 wires 45mm long, can be connected to Buzzer+ (red wire) and Buzzer- (black wire) to emit audio alert when the electric lock is activated by UniLock or externally (different alerts/tones). Flat response for a wide range of frequencies.

| | | | End-User recommended price (for 1pce) |
| | | | 1,30 EUR + VAT |

AERIALS for 433.92 and 868.3 MHz bands, best quality, Made in Italy

Antenna 433.92 MHz standard

2.1dBi gain, 50Ω impedance, 425-440 MHz band, 10W max

Dimensions: H=220x30x150mm, Weight: 0.2kg

Stainless steel bracket, screws and nuts. RoHS.

All metal and plastic parts are designed to resist to oxidation and corrosion.

Assembled with 3m RG58 coax cable

Protected RF connector, with hole, for water drain.

Protected from ElectroStatic Discharges up to 12kV.

Price/each, VAT excluded

| | | | |
|--|--|--|--|
| | | | End-User recommended price (for 1pce) |
| | | | 17,20 EUR + VAT |

Antenna 433.92 MHz narrow bandwidth

2.1dBi gain, 50Ω impedance, 433-435 MHz band, 10W max. Antenna has LC filter to reduce noise outside 433-435MHz band

Dimensions: H=310x30x150mm, Weight: 0.2kg

Stainless steel bracket, screws and nuts. RoHS.

All metal and plastic parts are designed to resist to oxidation and corrosion.

Assembled with 3m RG58 coax cable

Protected RF connector, with hole, for water drain.

Protected from ElectroStatic Discharges up to 12kV.

Price/each, VAT excluded

| | | | |
|--|--|--|--|
| | | | End-User recommended price (for 1pce) |
| | | | 20,40 EUR + VAT |

Antenna 433.92 MHz narrow bandwidth, with SMA-male connector

2.1dBi gain, 50Ω impedance, 433-435 MHz band, 10W max. Antenna has LC filter to reduce noise outside 433-435MHz band

Dimensions: H=310x30x150mm, Weight: 0.2kg

Stainless steel bracket, screws and nuts. RoHS.

All metal and plastic parts are designed to resist to oxidation and corrosion.

Assembled with 3m RG58 coax cable and SMA connector

Protected RF connector, with hole, for water drain.

Protected from ElectroStatic Discharges up to 12kV.

Price/each, VAT excluded

| | | | |
|--|--|--|--|
| | | | End-User recommended price (for 1pce) |
| | | | 25,90 EUR + VAT |

Antenna 868.3 MHz

2.1dBi gain, 50Ω impedance, 860-880 MHz band, 10W max

Dimensions: H=150x100x150mm, Weight: 0.2kg

Stainless steel bracket, screws and nuts. RoHS.

All metal and plastic parts are designed to resist to oxidation and corrosion.

Assembled with 3m RG58 coax cable

Protected RF connector, with hole, for water drain.

Protected from ElectroStatic Discharges up to 12kV.

Price/each, VAT excluded

| | | | |
|--|--|--|--|
| | | | End-User recommended price (for 1pce) |
| | | | 19,70 EUR + VAT |

BATTERIES and CELLS, Hg-free

CR2032, 3V LiMnO₂ cell, 240mAh, very high quality, bulk packing, 40pcs/tray, 400pcs/pack, 4800pcs/carton NOT AVAILABLE

Can be sold with Ecotax included only for italian customers

Capacity: **240mAh**

Dimensions: diameter 20mm, height 3.2mm

| Price/cell, VAT excluded | | | End-User recommended price (for 1pce) |
|--------------------------|--|--|---------------------------------------|
| | | | 0,4000 |

CR2032, 3V LiMnO₂ cell, 210mAh, blister packing 5cells/blister, 20blister/pack, 200blister/carton (1000cells) NOT AVAILABLE

Can be sold with Ecotax included only for italian customers

Capacity: **210mAh**

Dimensions: diameter 20mm, height 3.2mm

| Price/cell, VAT excluded | | | End-User recommended price (for 1pce) |
|--------------------------|--|--|---------------------------------------|
| | | | 0,4000 |

CR2025, 3V LiMnO₂ cell, 165mAh, blister packing 5cells/blister, 20blister/pack, 200blister/carton (1000cells) NOT AVAILABLE

Can be sold with Ecotax included only for italian customers

Capacity: **165mAh**

Dimensions: diameter 20mm, height 2.5mm

| Price/cell, VAT excluded | | | End-User recommended price (for 1pce) |
|--------------------------|--|--|---------------------------------------|
| | | | 0,4000 |

CR2016, 3V LiMnO₂ cell, 80mAh, blister packing 5cells/blister, 20blister/pack, 200blister/carton (1000cells) NOT AVAILABLE

Can be sold with Ecotax included only for italian customers

Capacity: **80mAh**

Dimensions: diameter 20mm, height 1.6mm

| Price/cell, VAT excluded | | | End-User recommended price (for 1pce) |
|--------------------------|--|--|---------------------------------------|
| | | | 0,4000 |

23A, 12V alkaline cell, Hg-free, 56mAh, high quality, bulk packing 50pcs/carton

Can be sold with Ecotax included only for italian customers

Capacity: **56mAh**

Dimensions: length 28.5mm, diameter 10mm

| Price/each, VAT excluded | | | End-User recommended price (for 1pce) |
|--------------------------|--|--|---------------------------------------|
| | | | 0,9000 |

27A, 12V alkaline cell, Hg-free, 20mAh, high quality, bulk packing 50pcs/carton NOT AVAILABLE

Can be sold with Ecotax included only for italian customers

Capacity: **20mAh**

Dimensions: length 28.5mm, diameter 8mm

| Price/each, VAT excluded | | | End-User recommended price (for 1pce) |
